	Month	Page
Second Middle Atlantic Region Conference Held May 3 and 4, Six Schools Participate; U. of Virginia Student Branch Host	*July*	27
Section Seeks Material on Naval Aviation History	*June*	39
Servomechanisms, Inc., Is New IAS Corporate Member	*Mar.*	31
Seventh Annual West Coast Regional Student Conference Draws 150 Students and Faculty Advisers to Los Angeles	*Sept.*	23
Six Institute Members in New Engineering Firm	*Aug.*	23
Sixth Anglo-American Aeronautical Conference	*May*	51
Sixth International Aeronautical Conference Is Taking Shape; 16 Technical Presentations, Plant Tours, Air Show on Agenda	*Jan.*	20
Southeastern Conference Draws 8 Schools, 22 Papers; Atlanta Section Sponsors Annual Student Competition	*July*	29
Southwest Products Co. Joins IAS Corporate Membership	*July*	23
St. Louis Section Sponsors Regional Student Conference, 19 Technical Papers Entered; 150 Attend Awards Banquet	*Aug.*	31
Stanford Appoints Nicholas J. Hoff Executive Head of Aero. Engineering	*Mar.*	31
Systems Laboratories Corporation Is New IAS Corporate Member	*May*	54
Treasurer's Report—1956	*Mar.*	22
12th Annual Flight Propulsion Meeting	*June*	37
Two IAS Corporate Members Sponsor Purdue Research Center	*June*	39
Two Institute Members Form Own Companies	*Nov.*	23
Varied Program Planned for IAS National Summer Meeting	*May*	52
Vitro Corp. of America, Thieblot Division, Joins IAS	*Apr.*	36
Edward P. Warner Retires From ICAO Council Presidency	*July*	23
Warner Selected Recipient of Wright Memorial Trophy	*Jan.*	20
Weapons System Management Meeting Named First National Midwestern Meeting	*Oct.*	29
Weapons System Management Program	*Oct.*	29
Zakhartchenko Honored by USN for Work on Petrel Missile	*Mar.*	31

INSTRUMENTS

Elevated Temperature Requirements for a New Air-Borne Flight Analyzer, Christian J. Van Der Maas	*Mar.*	37
Flight-Test Instrumentation for Vertical Take-Off Aircraft, E. R. Hinz and R. A. Fuhrman	*Feb.*	75

INTERNATIONAL GEOPHYSICAL YEAR

Radio Tracking, Orbit and Communication for the Earth Satellite, John P. Hagen	*May*	62
Role of the Earth Satellite in Four Important IGY Experiments, R. W. Porter	*May*	89

MATERIALS

Behavior of Materials Under Combined Stresses in Pressurized Structures, A. D. Topping	*Feb.*	56
Beryllium as an Aircraft Structural Material, George A. Hoffman	*Feb.*	50
Note on the Theory of Fracture Under Combined Stresses, M. Zaustin	*June*	43
An Outline of Things to Come, Col. John N. Dick and Lt. Col. Preston L. Hill	*Dec.*	26
Selection of Testing Locations in Aluminum Die Forgings, Ihor E. Suchoversky	*Jan.*	29

MEETING REPORTS

Air Safety Problems, Welman A. Shrader and R. C. McGuire	*Mar.*	42
Anchors Aweigh—Navy Joins IAS in Sponsoring One of Year's Outstanding Meetings, Welman A. Shrader	*Oct.*	36
IAS National Summer Meeting—Summary of Technical Sessions, Allan Bernhardt	*Sept.*	40
25th Annual Meeting—Summary of Technical Sessions, Allan Bernhardt	*Apr.*	69

METEOROLOGY

Clear-Air Turbulence Over the United States, LeRoy H. Clem	*Nov.*	63
A Model Atmosphere for Widespread Precipitation, David Atlas and Edwin Kessler, III	*Feb.*	69

MILITARY AVIATION

Air Force Logistics, Allen R. Ferguson	*Jan.*	40
Air Force Research and Development in Space Technology, Lt. Gen. Thomas S. Power, USAF	*Sept.*	36
Analysis of an Electrical Flight-Control System for Interceptor-Type Aircraft, E. Price and R. Westerwick	*Aug.*	63
Criteria for the Design and Selection of a Defense Complex, L. L. Stahl	*June*	78
Flight Testing Stability Augmentation Devices for High-Performance Fighters, A. W. Blackburn	*Sept.*	75
Military Operations Research, Francis E. O'Meara	*Dec.*	56
For Naval Aviation—A Bright Future, The Honorable Thomas Gates, Jr.	*Oct.*	42
New Organizational Alignments in the Bureau of Aeronautics, Rear Adm. James S. Russell, USN	*Jan.*	47
A Report on Missile Development	*May*	114

NAVIGATION

Aids to Inertial Navigation, Frederick Stevens and Frank W. Lynch	*Nov.*	43
Doppler Navigation, William J. Tull	*May*	58
Principles of Self-Contained Navigation, H. H. Bailey	*Aug.*	68
Problems in Doppler Navigation, Floyd T. Wimberly and Craig L. Crowell	*Oct.*	48
Self-Contained Navigation Systems, Lt. Col. Robert W. West, USAF	*May*	96

NECROLOGY

Lawrence D. Bell	*Jan.*	21
Stanley U. Benscoter	*Feb.*	46
Bernard Bercovitz	*Jan.*	21
Emerson C. Briggs	*Aug.*	35
Charles E. Craven	*June*	82
Paul De Kuzmik	*Jan.*	21
John A. Eubank	*Aug.*	35
Claude M. Fligg	*Oct.*	33
Chester W. Gates, Jr.	*July*	70
Harold Gatty	*Dec.*	19
Berthin Grottland	*May*	55
Gilbert P. Haven	*Oct.*	33
Bradley Jones	*May*	55
Major Merwin Kanter	*Nov.*	23
Lt. Almos E. Land	*Aug.*	35

	Month	Page
Leo Abbott Leissler	*May*	55
Willis I. Milham	*Oct.*	33
Conrad F. Nagel, Jr	*Sept.*	90
F. Glen Nesbitt	*May*	55
Captain John E. Ostrander, Jr	*Nov.*	23
Roland E. Owen	*June*	85
Modesto Panetti	*July*	70
Dennis J. Phelan	*Feb.*	46
Fidia J. Piattelli	*Nov.*	25
J. Henry Reisner	*June*	85
Edward W. Rice, Jr	*Nov.*	25
Raymond M. Ryan	*Mar.*	31
Daniel C. Sayre	*Jan.*	21
George L. Shue	*June*	85
Frederick Sigrist	*Mar.*	60
Ernest W. Stedman	*June*	85
Comdr. Jack J. Tomamichel	*Dec.*	19
Joseph A. Wise	*Mar.*	60
Robert J. Woods	*Jan.*	22

OPERATIONS

The Aircraft Assignment Problem, Ram Vaswani	*Feb.*	64
Military Operations Research, Francis E. O'Meara	*Dec.*	56

PERFORMANCE

Application of Dynamic Programing to the Airplane Minimum Time-to-Climb Problem, T. F. Cartaino and S. E. Dreyfus	*June*	74

PROPULSION

An Analytical Method of Evaluating Thermal Stresses in Gas-Turbine Blades, William B. Sanders, Jr., and E. A. Trabant	*Apr.*	52
Design of Air Frames for Nuclear Power, Clarence L. Johnson and F. A. Cleveland	*June*	48
Effect of Dynamic Characteristics of Rocket Components on Rocket Control, John C. Sanders, David Novik, and Clint E. Hart	*Oct.*	73
Liquid Rocket Propellants: Is There an Energy Limit?, John F. Tormey	*Oct.*	54
Modern Developments in Solid-Propellant Rocket Engineering, Richard D. Geckler and Robert E. Davis	*Aug.*	42
Optimum Thrust Programing for High-Altitude Rockets, G. Leitmann	*June*	63
Our Atomic Future (*Editorial*), J. Carlton Ward, Jr	*June*	44
Power Plants for VTOL Aircraft, Peter G. Kappus	*Sept.*	83
Some Effects of Inlet Pressure and Temperature Transients on Turbojet Engines, D. Gabriel, L. Wallner, R. Lubick, and G. Vasu	*Sept.*	54
Testing Aircraft Nuclear Power Plants, A. R. Crocker	*Dec.*	30

ROCKETS & MISSILES

Effect of Dynamic Characteristics of Rocket Components on Rocket Control, John C. Sanders, David Novik, and Clint E. Hart	*Oct.*	73
Liquid Rocket Propellants: Is There an Energy Limit?, John F. Tormey	*Oct.*	54
Modern Developments in Solid-Propellant Rocket Engineering, Richard D. Geckler and Robert E. Davis	*Aug.*	42
Notes on Problems in Combustion Instability of Rocket Motors, T. Paul Torda	*Nov.*	34
Optimum Thrust Programing for High-Altitude Rockets, G. Leitmann	*June*	63
A Report on Missile Development	*May*	114

SAFETY

Air Safety Problems, Welman A. Shrader and R. C. McGuire	*Mar.*	42
Design of an Apparatus for the Measurement of the Combustibility Hazard of Gases in Aircraft and Other Applications, Enoch J. Durbin	*Apr.*	58
Escape From High-Performance Aircraft, Thomas G. Kilgariff	*July*	59
Greater Safety Through Crash Injury Analyses, Howard A. Hasbrook	*June*	67
Sky Diving, Major R. L. Oakley, USAF	*Jan.*	56

SATELLITES

Meteoric Dust Erosion Problem and Its Effect on the Earth Satellite, Stuart A. Hoenig	*July*	37

SPACE TECHNOLOGY

Air Force Research and Development in Space Technology, Lt. Gen. Thomas S. Power, USAF	*Sept.*	36

STRUCTURES

Behavior of Materials Under Combined Stresses in Pressurized Structures, A. D. Topping	*Feb.*	56
Design of Air Frames for Nuclear Power, Clarence L. Johnson and F. A. Cleveland	*June*	48
Problems in Estimating Structure Weights, Mervyn G. Heal	*Mar.*	52
Some Notes on Sandwich Design for Minimum Weight as Applied to Airplane Wings, J. G. Willis	*Oct.*	44
Structures for High Speed, N. J. Hoff	*Jan.*	54
Thermal Creep Design Criteria, Robert Goldin	*Dec.*	36
Thermoelastic Distortion and Wing Structural Design, John H. Meyer	*Sept.*	46

SYSTEMS ENGINEERING

How to Improve Systems Engineering, John N. Warfield	*July*	50
The New Emphasis on Systems Engineering, Simon Ramo	*Apr.*	40

TECHNICAL PLANNING

Around the Requirement in Thirty Minutes, Rear Adm. D. J. Welsh, USN	*Nov.*	54

TRAFFIC CONTROL

Airspace Use for Air Traffic Control and Air Defense, D. D. Thomas	*May*	110
Common System Standards, Howard K. Morgan	*May*	94
The Long View (*Editorial*), The Honorable Edward P. Curtis	*Apr.*	38

VTOL & STOL AIRCRAFT

Evaluation of VTOL Systems Suitable for Transport Aircraft, W. Z. Stepniewski and Joseph Mallen	*Sept.*	60
Flight-Test Instrumentation for Vertical Take-Off Aircraft, E. R. Hinz and R. A. Fuhrman	*Feb.*	75
The Jet Wing, John S. Attinello	*Aug.*	52
Power Plants for VTOL Aircraft, Peter K. Kappus	*Sept.*	83
Problems of Stability and Control for VTOL Aircraft, James A. O'Malley, Jr	*Oct.*	78

	Month	Page
Propeller Selection for High Static and Forward Flight Efficiency for VTOL Aircraft, Ken S. Coward	*July*	41
Some Remarks on the Jet Wing and VTOL Aircraft, D. Kuchemann and E. C. Maskell	*Aug.*	56
Take-Off and Landing Distance and Power Requirements of Propeller-Driven STOL Airplanes, Richard E. Kuhn	*Nov.*	38
VTOL Fixed-Wing Aircraft, Ken S. Coward	*Jan.*	35

WIND TUNNELS

Letter to the Editor on "Note on a Tabletop Wind Tunnel for Study of Supersonic Flow" by Lewis Dewart, IV, Ronald S. H. Toms	*Oct.*	35
Note on a Tabletop Wind Tunnel for Study of Supersonic Flow, Lewis Dewart, IV	*July*	31

Author Index

ALLEN, RALPH. Aerodynamic and Economic Characteristics of Turboprop Air-Line Transport Systems	*July*	55
ARGYROPOULOS, TIMOLEON G. Direct Solution of the Heat-Balance Equation for Thermal Anti-Icing Systems	*Feb.*	60
